

# Social Media Personality Profiling

Abbas Maazallahi a.maazallahi@ut.ac.ir

https://t.me/a\_maazallahi

8/20/2020

## Taxonomy of social profiling

#### **DEMOGRAPHICS**

Age, Gender
Education
Income, Occupation
Marital Status
Religion
Race / Ethnicity
Language
Region/Location
City, Nationality

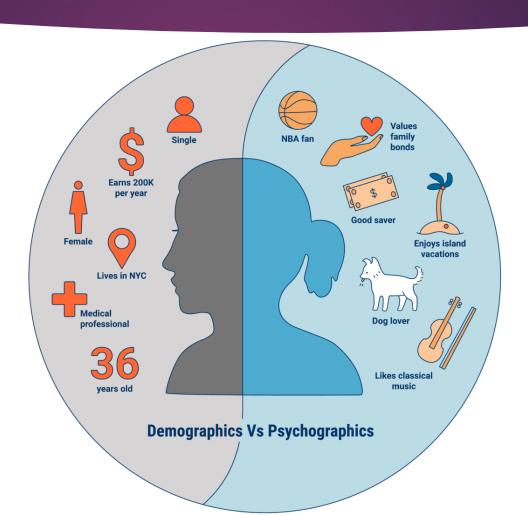

#### **PSYCHOGRAPHICS**

Personality
Behavior, Emotions
Mood, Habits
Social Influence
Preference
Social Connections
Activity, Interests
Opinions, Attitudes
Values

#### WELLNESS

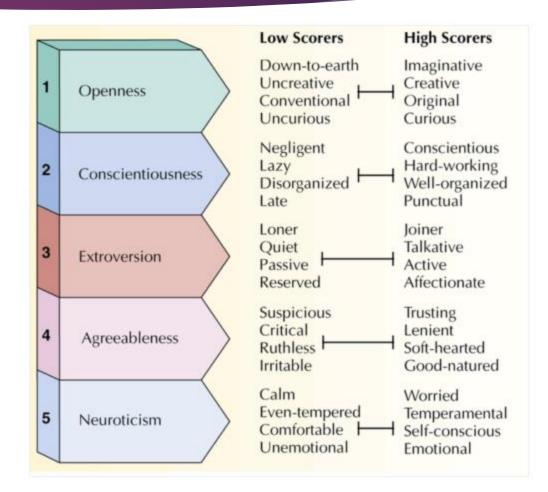

Body Mass Index Disease Tendency

## Demographics vs Psychographics

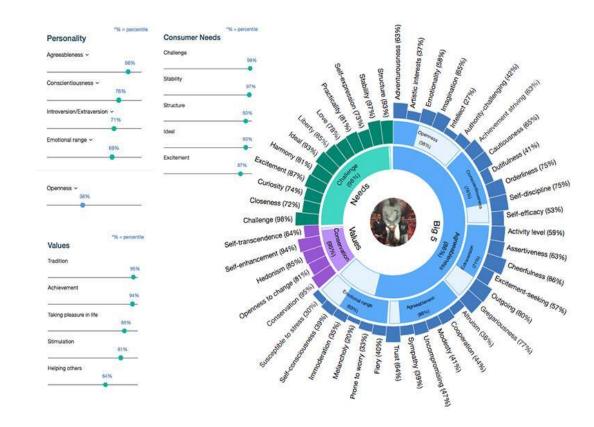

# OCEAN model of personality (psychographic profile)

https://www.cbinsights.com/research/what-is-psychographics/

## IBM's Personality Insights tool

https://www.welcome.ai/tech/personalization/ibm-watson-personality-insights

## Cognitive Ability

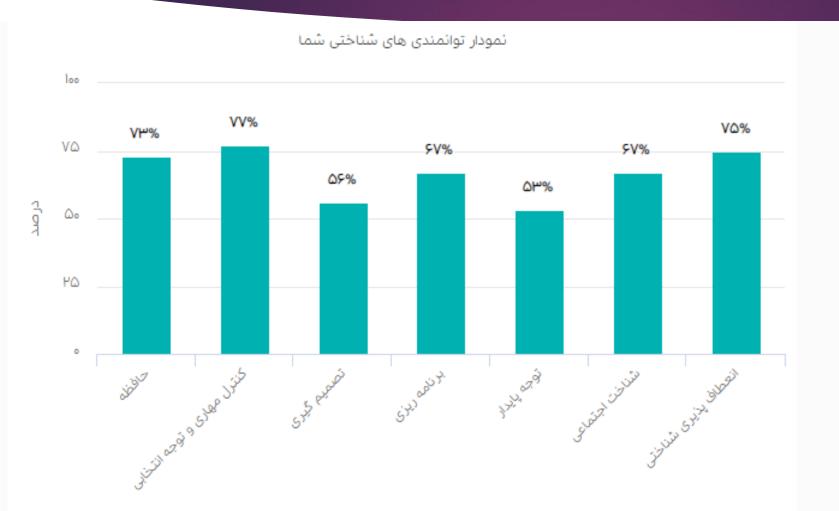

https://practicereasoningtests.com/cognitive-ability-tests/

The most popular cognitive ability assessment that is built on the General Ability theory and has been in use for years now is the Intelligence Quotient (IQ) test

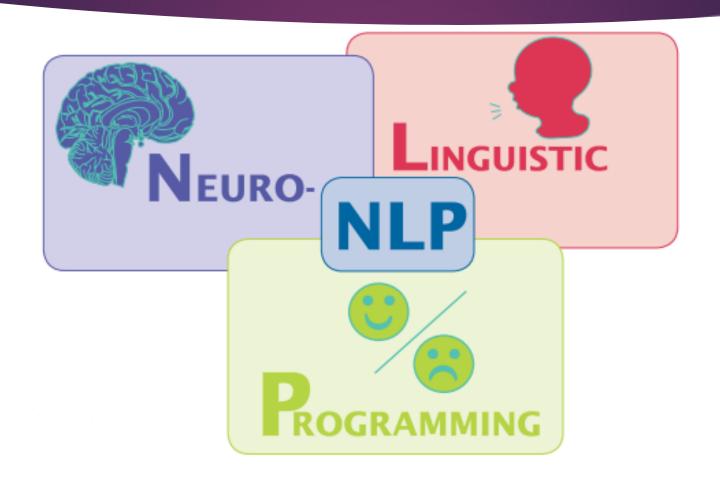

- Verbal (linguistic): lexical skills, formal speech, verbal argument, and creative writing.
- Body (kinesthetic/movement): body language, physical gestures, creative dance, physical exercise, drama.
- Musical (rhythmic): music performance, singing, musical composition, and rhythmic patterns.
- Logic (mathematic): numerical aptitude, problem solving, and deciphering codes, abstract symbols, and formulae.
- Visual (spatial): Developing and recognising patterns and designs, painting, drawing, active, imagination, sculpture, and colour schemes.
- Interpersonal (relationships with others): The person-to-person communication, empathy practices, group projects, collaboration skills, receiving and giving feedback.
- Intrapersonal (self-understanding and insight): thinking strategies, emotional processing, knowing yourself, higher order reasoning, focusing and concentration.

Also, Creativity and Memory are sometimes added as separate intelligences, making up the eighth and the ninth intelligence categories under the Gardner model.

## Cognitive Ability

انعطاف پذیری شناختی شناخت اجتماعی توجه پایدار برنامه ریزی تصمیم گیری کنترل مهاری و توجه انتخابی حافظه

#### SOCIAL NETWORK ANALYSIS

## پردازش متن در شبکههای اجتماعی

متنهای مربوط به کاربران حاوی اطلاعات ارزشمندی میباشد که امکان تحلیل و پردازش دارند.

به طور کلی میتوان متنهای مختلفی را منتسب به کاربر کرد:

- → نام کاربری
- → نام مستعار
  - 🕨 بیوگرافی
- ◄ متنهای منتشر شده در قالب توئیت، پست و پیام
- ▶ کامنتهای گذاشته شده بر روی پستهای خود و دیگر کاربران
  - ▶ کامنتهای دریافتی از دیگر کاربران
    - ▶ هشتگهای استفاده شده
      - ▶ کاربران منشن شده
    - ▶ لینکهای URLاستفاده شده
      - emoji 🕨

...

## پردازش متن در شبکههای اجتماعی

اطلاعات مختلفی را از طریق پردازش متن در شبکههای اجتماعی میتوان استخراج کرد:

- (Classifier) زبان کاربر
- (Classifier) گویش کاربر
- (Classifier) علائق كاربر
- (Classifier or Lookup table) شناسایی سن و جنسیت کاربر
- ► شناسایی احساس و جهت گیری کاربر پیرامون موضوعات مختلف (Classifier)
  - ✓ یافتن نگرش کاربر کاربر حول موضوعات مختلف (Classifier)
  - ▶ اطلاعات مربوط به شغل و حرفه و تواندیهای کاربر (Classifier)
    - ◄ ارتباطات و کیفیت ارتباط با دیگر کاربران (Link Prediction)

...

#### facebookresearch/fastText

fastText is a library for efficient learning of word representations and sentence classification.

#### Models:

- Recent state-of-the-art English word vectors.
- Word vectors for 157 languages trained on Wikipedia and Crawl.
- Models for language identification and various supervised tasks.

### spaCy: Industrial-strength NLP

- spaCy is a library for advanced Natural Language Processing
- built on the very latest research,
- spaCy comes with pretrained statistical models and word vectors
- supports tokenization for 50+ languages
- convolutional neural network models for tagging, parsing and named entity recognition

#### Tweet2Vec

#### Challenges of social media text:

- Informal language, spelling errors, abbreviations, and special characters are all commonplace in these posts,
- leading to a prohibitively large vocabulary size for word-level approaches.

Tweet2vec is a character composition model, which finds vector-space representations of whole tweets by learning complex, non-local dependencies in character sequences. The proposed model outperforms a word-level baseline at predicting user-annotated hashtags associated with the posts, doing significantly better when the input contains many out-of-vocabulary words or unusual character sequences. Our tweet2vec encoder is publicly available.

#### پیش بینی جنسیت و سن از طریق نام کاربری افراد

```
>>> import gender_guesser.detector as gender
>>> d = gender.Detector()
>>> print(d.get_gender(u"Bob"))
male
>>> print(d.get_gender(u"Sally"))
female
>>> print(d.get_gender(u"Pauley")) # should be androgynous
andy
```

Deep Learning-Based Document Modeling for Personality Detection from Text

## پردازش تصویر در شبکههای اجتماعی

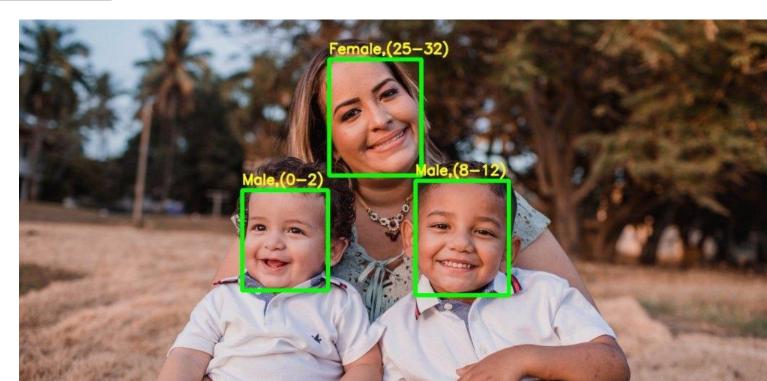

## پروژههای پیشنهادی در پردازش تصویر کاربران

- (Age Gender Prediction) استخراج سن و جنسیت افراد
- ♦ استخراج حالات روحی افراد (Facial Expression Recognition)
  - ▶ استخراج ویژگیهای ظاهری چرهی افراد
  - (Race and Ethnicity Prediction) شناسایی نژاد افراد
    - ▶ استخراج شاخص تراکم بدن (Body Mass Index)
  - ▶ شناسایی غذاهای مورد علاقه کاربران و کالری مصرفی

## Age Gender Estimation

# Real-time object detection and classification

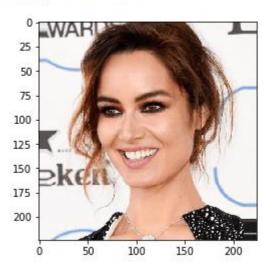

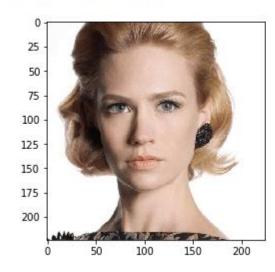

#### Beauty Score Prediction

#### https://github.com/ustcqidi/BeautyPredict

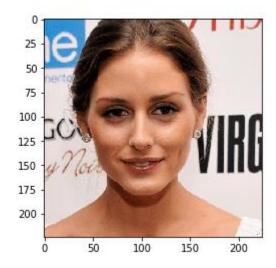

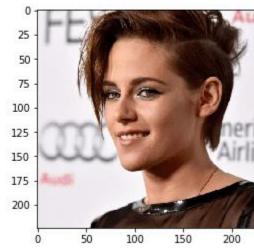

January Jones ( Woman ) Beauty score: 105.07

Olivia Palermo ( Woman ) Beauty score: 101.13

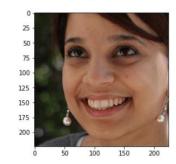

Kristen Stewart ( Woman ) Beauty score: 100.29

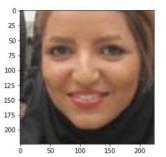

# Race and Ethnicity Prediction From Image

https://github.com/HectorAnadon/Face-expression-and-ethnic-recognition

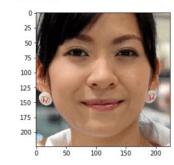

Actual: Latino\_Hispanic Predicted: Latino\_Hispanic

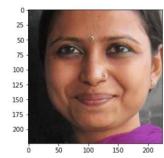

Actual: Middle Eastern Predicted: Middle Eastern

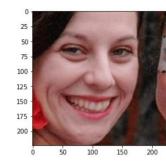

Actual: Asian Predicted: Asian

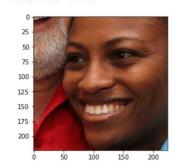

Actual: Indian
Predicted: Indian

Actual: White Predicted: White

Actual: Black Predicted: Black

#### Attractiveness Score Prediction

https://github.com/LiuXiaolong19920720/predict-facial-attractiveness

5.4782608

5.0869565

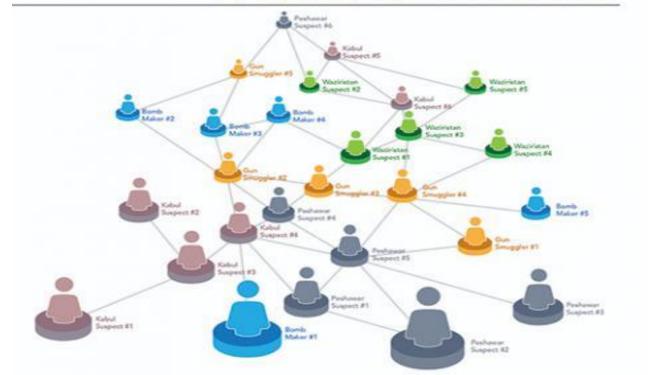

4.8901098

4.7553191

## تحلیل ارتباطات در شبکههای اجتماعی

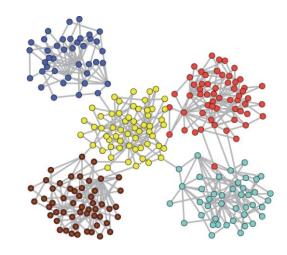

#### SOCIAL NETWORK ANALYSIS

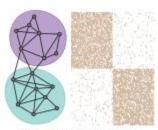

#### تحلیل ارتباطات در شبکههای اجتماعی

#### شناسایی انجمن در شبکههای اجتماعی

الگوریتمهای مختلفی در این مورد وجود دارد که هر کدام بسته به ویژگیهای گراف کاربردهای مختلفی دارند .بعضی از آنها برای شناسایی انجمنهای دارای همپوشانی قوی کاربرد دارند .بعضی از آنها برای شناسایی انجمنها در گرافهای تنک کاربرد دارند و ...

(b) Sparse overlaps

(c) Dense overlaps

#### NetworkX

NetworkX is a Python package for the creation, manipulation, and study of the structure, dynamics, and functions of complex networks.

#### **Features**

- Data structures for graphs, digraphs, and multigraphs
- Many standard graph algorithms
- Network structure and analysis measures
- Generators for classic graphs, random graphs, and synthetic networks
- Nodes can be "anything" (e.g., text, images, XML records)
- Edges can hold arbitrary data (e.g., weights, time-series)
- Open source <u>3-clause BSD license</u>
- Well tested with over 90% code coverage
- Additional benefits from Python include fast prototyping, easy to teach, and multi-platform

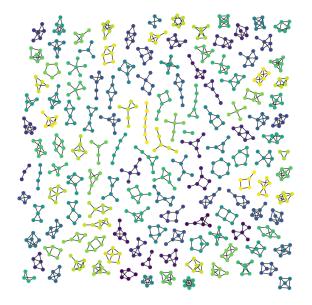

#### KarateClub

A general purpose community detection and network embedding library for research built on NetworkX.

#### Graph Classification

یکی دیگر از رویکردهای تحلیل گراف در شبکههای اجتماعی اجرای روشهای دسته بند وابسته به ارتباطات در شبکه میباشد .با این مضمون که برچسبهای گرهها بین همسایهها به اشتراک گذاشته میشود.

# پروژههای ترکیبی و استفاده از دادههای مختلف برای افزایش دقت و کارآیی

https://link.springer.com/chapter/10.1007/978-981-15-1925-3\_20

استفادهی همزمان از دادههای مختلف در شبکههای اجتماعی مانند متنها و تصاویر منتشر شده، ارتباطات موجود و سایر اطلاعات درون شبکه این امکان را برای ما فراهم میکند تا بتوانیم با دقت بیشتری ویژگیهای شخصیتی و فردی افراد را استخراج کنیم.
